

Saving Favorite Parts

If you'd like to save parts that you've found in your PartQuest search for convenient access later, you can do so using the **Favorites** feature.

To add parts to your favorites, you have two options. To add a single part, you can click the heart in the top left corner of the search result.

If you have multiple parts to add, you can use the batch actions to add them to your favorites. Just select all of the parts you would like to save, then click **Favorite** in the top right corner of the listing of search results.

To view your favorite parts, click the **Favorites** link, found on the left side of the search results page. From the favorites page, you can add parts to projects or download them using the same methods as the search results page.

To remove a part from your favorites, select the part and click the **Remove from Favorite** button in the top right corner of the page.
