

Managing Parts with 'My Projects'

Project folders allow you to organize parts found through the PartQuest search. To begin adding parts to a project, you must first create a project by clicking **My Projects** in the left sidebar. Click **Edit Projects** and then **Create New Project**, enter a name for your project, and select **Done**.

Edit Projects

Add, remove, and rename projects

| | | |
|------------------------|---|---|
| Sample Project |  |  |
| Lena's Arduino |  |  |
| New Project |  |  |
| Beth's requested parts |  |  |

[+ Create New Project](#)

You can now add parts to a project by selecting **Add to Project** under the expanded search result view.

Delay Operating Temperature
-40°C ~ 85°C
